This survey is part of a series of cooperative investigations of educational, health, and sociological conditions in the State of Delaware by the Public Health Service, the National Bureau of Education, the Children s Bureau, and other agencies. In order to supply certain data desired by the Children s Bureau in their investigations, the mental survey herein reported was conducted preliminary to the general survey. It continued from January 6 to May 1, 1916. During this investigation 3,793 children were studied. Of these, 19, or 0.5 per cent of the total, were found to be de nitely feeble-minded and in need of careful supervision or institutional treatment. In addition, 50 other children, or 1.3 per cent of the total number examined, exhibited abnormal mental symptoms to such an extent as to be considered probable mental defectives. At the beginning of this survey a majority of the school children were tested by the Binet-Simon scale, and those who showed symptoms of mental abnormality were examined by supplemental methods. The routine giving of the Binet tests to every pupil was soon replaced by a briefer sifting process for the purpose of nding those children of low intelligence or those in whom mental peculiarities existed. This brief examination was composed...
