By Brian Clette

Createspace, United States, 2015. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. In his 43 page book the kurious kid is going to take young readers on a journey to becoming a rocket scientist (someone who builds rockets) the reader will be guided through the history of rockets, and how they've changed over many years they will learn things like, what sort of fuel they use. How much they weigh, how far they can travel through space and what different types of rockets are used for, for instance some are designed to be powerful enough to lift entire space shuttle into the stratosphere, while others are designed to put television satellites and other communication satellites into Earth's orbit so that the signal they project will reach Earth and there are even smaller rockets that are designed to help satellites and space shuttles maneuvered through outer space so that they don't bump into any asteroids. Aside from learning about the rockets used by NASA (national and space agency) and the rockets they build better designed to take people and satellites into space for exploration purposes the kurious kid...
