Beyond the falls the banks are less high, and the immediate valley of the river becomes more extended. The St. Peter s, which has its source about 500 miles from this point, courses through a valley, varying in breadth from one to three miles, which is marshy, owing to the inundation of the river. The surface of the surrounding country presents an undulating prairie, studded here and there with islands of timber. Large lakes, plentifully supplied with fish, are occasionally found. The soil, although sandy, is productive. These facts have been furnished by Assistant Surgeon John Emerson. As the data of this post have been constantly used for the purpose of elucidating the various systems of climate, the necessity of any detail now...
